### MXO37 Series - Vacuum-Sealed Miniature OCXOs

#### Features

- Low Power Consumption (0.15W at +25°C)
- 14DIP Compatible Packaging
- High Stability (up to  $\pm 5 \times 10^{-9}$  over -10°C to 60°C)
- Very Fast Warming-up (15 s)
- Low Phase Noise (-165 dBc/Hz, TYP, floor)
- Low Aging ( $5 \times 10^{-10}$ /day,  $5 \times 10^{-8}$ /year)
- Wide Frequency range (5 – 250 MHz)

#### Typical Applications

- Portable Wireless Communications
- MobileTest equipment
- Synthesizers
- Battery Powered Application

14 DIP compatible

RoHS compliant

#### Description

The MXO37 series uses internal heating resonator technology (IHRT) with arrangement of the oven system together with the crystal plate inside TO-8 vacuum holder. Such approach results in radical reduction of the OCXO sizes, power consumption and warm-up time. In spite of ultra-miniature sizes and extremely low power consumption this part has excellent temperature stability, phase-noise and aging making it very advantaged over high-end OCXOs of conventional designs. The MXO37 series OCXOs are available in 8DIP and 14DIP compatible versions.
